

SSPL Billing

Application Feature Overview

Sundaram and Sons Private Ltd.

Wholesale billing & ERP front-end

Built on Frappe / ERPNext v16 · Vue 3 SPA

Version snapshot: 2026-07-25

Branch: feat/socketio-gst-merge

Feature Overview

Full module & page inventory of the ssplbilling app

1. Sales & Billing

Feature	Route	What it does
Sales Entry	/sales	Keyboard-driven draft invoice entry. Operator picks customer, scans/searches items, saves Draft Sales Invoice (stock updates on save).
Wholesale Fast Billing	/ (legacy, kept as backup)	Barcode-scan POS screen for rapid counter billing.
Cashier Desk	/cashier	Lists draft invoices; cashier splits payment across multiple modes (cash/UPI/card/etc.) and submits.
Cashier Management	/Cashier-Management	Cashier opening/closing float management, session oversight.
Cancellation	/cancellation	Cancels submitted invoices with linked reversal of incentives, stock and ledger entries.
Single Entry	/single-entry	Simplified one-shot billing entry mode.
Sales Order Entry	/sales-order	Create/manage Sales Orders ahead of invoicing.
Quotation	/quotation	Draft customer quotations.
Bill Mirror Creator	component	Duplicates/mirrors an existing bill for quick re-entry.
Customer Enquiry	/customer-enquiry	Logs and tracks customer product enquiries.
Parcel Address	/parcel-address	Manage delivery/parcel addresses linked to orders.
Offer Page / Offer Display	/offer/:pageaddress, /offer-display	Customer-facing offer/scheme display pages.
Catalogue	/catologue	Browsable item catalogue view.

2. Purchase

Feature	Route	What it does
Purchase Invoice	/purchase-invoice	Create/edit Purchase Invoices against suppliers.
Purchase Submit	/purchase-submit	Review and submit staged purchase invoices.
Purchase Order	/purchase-order	Create/manage Purchase Orders.
Supplier Creator	component	Quick-create Supplier with frontend pincode validation.

3. Inventory & Stock

Feature	Route	What it does
Item Creation	component	Create new Items, including image upload & preview.
Stock Reconciliation	/stock-reconciliation	Adjust on-hand stock counts against physical counts.
Store Transfer	/store-transfer	Move stock between warehouses/stores.
Repack	/repack	Repack bulk items into smaller sellable units.
Loading Receipt	/loading-receipt	Records goods loaded onto vehicles for dispatch/transfer.
Land Cost Voucher	/land-cost-voucher	Apply landed cost (freight/duty) onto received stock.
Barcode Print	/barcode-print	Generate and print item barcode labels.
Price List Update	/pricelist-update	Bulk update item price lists.
Pricing Rule Sync	component	Sync ERPNext pricing rules with discount rule engine.

4. Pricing, Discounts & Offers

Feature	Route	What it does
Discount Rule	/discount-rules	Configure slab/range (X-to-Y) and custom-logic discount rules per item/customer.
Customer Pricing	component	Customer-specific item price overrides.
Offer Sync / Offer API	backend	Publishes offers/schemes to customer-facing pages.

5. Payments & Ledger

Feature	Route	What it does
Payment / Receipt (v2)	/payment	Direct payment/receipt entry creation against customers or suppliers.
Customer Ledger	/ledger	General ledger view with running balance per customer.
General Ledger	/general-ledger	Full GL browsing across accounts/vouchers.
Journal / Contra Entry	/journal-contra	Manual journal and contra entry creation.
Cheque Register	/ (ChequeRegister)	Track issued/received cheques (SSPL Cheque doctype).
Unreconciled	component	Lists unreconciled ledger/payment entries.

Outstanding Bills Modal	component	Shows party's outstanding invoices for allocation.
Party History Modal	component	Quick transaction history lookup for a party.

6. GST & Compliance

Feature	Route	What it does
GST Ledger	/gst-ledger	GST-wise transaction ledger for return filing.
GST Dummy Ledger	/gst-dummy-ledger	Placeholder/simulated GST ledger for reconciliation testing.
GST Validator	component	Validates GSTIN and syncs GST category on invoices (auto-runs on Sales/Purchase Invoice validate).
E-Way Bill	component (EWayBillModal / Options)	Generate and manage E-Way Bill for shipments.

7. Incentives & Loyalty

Feature	Route	What it does
Incentive Entry	/incentive-entry	Record incentive-earning transactions per rule.
Incentive Ledger	/incentive-ledger	Running incentive balance per customer/employee.
Incentive Redeem	/incentive-redeem	Redeem accumulated incentive points/value.
Incentive Rule / System	doctype	Configurable incentive rule engine (rate, slab, linked invoice incentives). Auto-reversed on invoice cancellation.

8. Reports

Feature	Route	What it does
Reports Hub	/reports	Central launcher for all report screens.
Daily Report	/daily-report	Day-wise sales/collection summary.
Store Sales Report	/store-sale-report	Sales totals broken down by store.
Store-wise Item Sales	/store-wise-item-sales	Item-level sales split by store.
Item Sales Summary	/item-sales-summary	Aggregate sales per item across period.
Fast Moving Items	/fast-moving-items	Highlights top-velocity SKUs.
Cost Center Sales Report	/cost-center-sale-report	Sales performance grouped by cost center.
Stock Status Report	/stock-status-report	Live on-hand stock snapshot.
Stock Aging Report	/stock-aging-report	Stock age buckets to flag slow-moving inventory.
Material Transfer Report	/material-transfer-report	Tracks stock movement between locations.
Outstanding Customers Report	/outstanding-customers-report	Customers with pending receivables.
Ledger Sales/Purchase Report	/ledger-sales-purchase-report	Combined sales & purchase ledger view.
Cashflow Report	/cashflow-report	Cash inflow/outflow summary.
Expense	/expense	Log and report business expenses.

9. Administration & Settings

Feature	Route	What it does
SSPL Billing Settings	/ssplbillingsettings	Single DocType with billing_series child table (series, print format, price list, tax rate per series).
Naming Settings	/naming-settings	Configure naming series per user/document type (User Series doctype).
General Settings	component	App-wide preference toggles.
Employee Creator	component	Quick-create Employee records.
Customer Creator	component	Quick-create Customer + linked Address + Contact, with pincode validation.
Printer & Format Mapping	doctype	Maps document types to specific printers/print formats (default_printer_item/list).
Print Options Modal	component	Per-invoice print format/printer selection at print time.
System Performance	component	Client-side performance/diagnostics panel.
Shortcut Page / Command Line	component	Keyboard shortcut reference and command-palette style quick actions.

10. Real-time & Integration

Feature	Route	What it does
Socket.IO live sync	backend hooks	Publishes bill-panel and ledger-balance updates in real time on invoice insert/update/submit/cancel.
MQTT integration	MQTT Settings doctype	Maintains persistent MQTT broker connection (scheduler keeps it alive every tick); topic mapping via MQTT Topic Detail.
Panel Sync	backend	Pushes bill panel updates to connected clients/displays on every invoice lifecycle event.
Offline item/customer cache	IndexedDB	Dashboard syncs up to 5,000 items and customers into browser IndexedDB for instant offline-first search.
Price cipher	encryption.js	Maps price digits to configurable letters to obscure on-screen prices; cipher configurable per terminal.

11. Authentication

Feature	Route	What it does
Login	/login	Session-based login; router guard redirects unauthenticated users here.
Session singleton	session.js	Wraps frappe.auth.get_logged_user; exposes isLoggedIn/user/fullName app-wide.

Generated from repository state as of 2026-07-25, branch feat/socketio-gst-merge. Reflects routed pages, reusable components, backend API modules and hooks.py event wiring at time of generation — treat as a snapshot, not live documentation.
